

Diesel Engine Parts

We carry a selection of Isuzu parts in inventory, but being a Dealer, we have access to all the warehouses across North America! Mark is our resident engine parts Guru, so have your model, serial number along with the spec, year and vehicle the engine is in.

Electrical Parts

By providing our customers with the latest technology and products, our goal is that we can be a full service provider in the diesel and electrical market place.

Control Switch International Inc. has what you need to complete any electrical project your company produces. From terminal strips, wire ties to large rotary switches Csii is the soup to nuts in providing electrical switches. In house engineering and custom panel manufacturing are available to all customers.

We can fulfill your needs of electronic governors and speed switches. Woodward and Governors of America are two of the finest companies that provide these items to keep your power generating equipment operating efficiently.

Power Take Offs

NACD manufactures PTO assemblies from the small 7 1/8" and 7 7/8" housing bore applications with 4.5" and 5.5" oil bath or dry clutches suitable for horizontal shaft gas and diesel engines used in the construction industry for pumps, compressors, mixers, blowers, generators and other applications where a cut-off clutch is required, up to the larger housing sizes SAE 6 through SAE 1 with bronze-bearing and ball-bearing released over-center clutch sizes ranging from 6.5" single, 10" single, 11.5" single and double, 14" single, double, and triple plates. We have various pilot bearing configurations to suit different engines.
